

I would think that the fact that I pay for a radio service when I could get FM simply by turning on a tuner should be a clear message; ie. that I don't feel FM has anything I want. Now corporate radio is trying to take away something that I pay for? Not if I can help it! XM is providing a very valuable service to me or I wouldn't be paying to subscribe to it. So, to you, the FCC, I hope you will take my side on this bill and reject petition 04-160.
